**Question 1:**
Develop a responsive web page according to the following image.

Technology Considerations:
1. Languages: HTML, CSS & JavaScript
2. CSS Framework: Bootstrap or Foundation or Metro UI, you may also use media query for responsive design.

Question 2:

According to the following image, you have to develop a dynamic web application system with the below tasks.

    a. Create a new employee information
    b. Update the existing employee information
    c. Show the details of employee information
    d. Delete the existing employee information

Note: Name should be text field, gender should be radio button, department & city should be select option.

Technology Considerations:

    1. Language: PHP or C# or Java
    2. Backend Framework: PHP CodeIgniter or Laravel framework, C# ASP Dot Net or MVC or ASP Dot Net Core framework, Java Spring or Hibernate framework.
    3. Front End Framework: Angular JS or React JS or VUE JS.
    4. Database: MySQL or MS-SQL or Oracle.
